

1 sheet = 125 million years

● = 1 billion years

# Toilet Paper Timeline

	Sheet number (12.5 million years per sheet)	Time equal (years ago)	What happened?
1	0	5 billion	Earth formed
2	104	37 billion	Earth crust solid
3	120	35 billion	First life appears in oceans
4	140	325 billion	Photosynthesis begins in oceans
5	208	24 billion	Oceans contain significant amount of oxygen
6	248	19 billion	First cell nuclei appear within ocean
7	348	065 billion	First multicellular organisms appear
8	359	05 billion	First land plants
9	380	245 million	Age of Dinosaurs begins
10	388	150 million	Supercontinent breaking up
11	394	65 million	Age of Dinosaurs ends with mass extinction of 70% of all living things
12	400 (3.1cm from end)	35 million	First pre-modern humans appear in Africa
13	400 (1mm from end)	100,000	First Homo sapiens appear
14	400 (0.1mm from end)	10,000	Recorded human history begins
