Annual Exhibition

Accuracy of Species Recording Working Group

Established May 2017

Purpose:-

To develop the role of BENHS in promoting the importance of invertebrate species recording,
with emphasis on the essential need for accuracy

Accuracy of Species Recording Working Group

Established May 2017

Future plans:-

Increase engagement with regional societies and groups

Increase the scope of BENHS workshops

Take BENHS workshops to regional locations away from the SE

Promote high quality recording via website, at meetings etc

Formalise record submission from BENHS meetings

Offer assistance with Rothamsted bycatch identification
