

# British Society for Protist Biology Spring Meeting

The Natural History Museum, London  
10-12 April 2013

**Protists, other small organisms, and Next Generation Sequencing:  
A forum for ideas, news, information, and exchange**

This meeting will be an exciting forum for exchange of knowledge, experiences, discussion of obstacles, and learning about new experimental and analytical methods associated with NGS, from data generation to analysis.

Guest speakers include **Christopher Quince** (Computational Microbial Genomics Group, Glasgow University), **Si Creer** (School of Biological Sciences, Bangor University), **Konrad Paszkiewicz** (Wellcome Trust Biomedical Informatics Hub & Head of Exeter University Sequencing Service), **Micah Dunthorn** (Kaiserslautern University), and **Dawn Field** (Head, Molecular Evolution and Bioinformatics Group, NERC CEH)

Please visit [www.protist.org.uk/meetings.html](http://www.protist.org.uk/meetings.html) or [www.linnean.org/protist2013](http://www.linnean.org/protist2013) for more information, to **register** for this meeting, and to **submit oral presentation and poster abstracts (by 10 March)** on NGS-related topics or any other area of protistology

***Early bird registration ends 10 March 2013***
