

You Should Ask Wallace - Presented by Theatr na nÓg
9th December 2013, 18.00 – 19.00 at Linnean Society of London

The play tells the story of Alfred Russel Wallace (1823 -1913), a Victorian naturalist, who was born in Wales, and who discovered the theory of evolution, and then shared the idea with Charles Darwin... and as they say the rest is history.

This often overlooked Welsh Victorian scientist, who's curiosity as to why there are so many different varieties of species, was ignited during his formative years in Usk and Neath, and would later find the answer to the 'mystery of all mysteries'. His great findings

would compel Darwin to publish his seminal work on the origin of species. The play takes us through his life as a young boy growing up in Wales to embarking on epic adventures to the Amazon and Malay Archipelago where he co-discovers the process of evolution by natural selection.
